

SNOWFLAKE-NATIVE APP & SERVICENOW PLUGIN

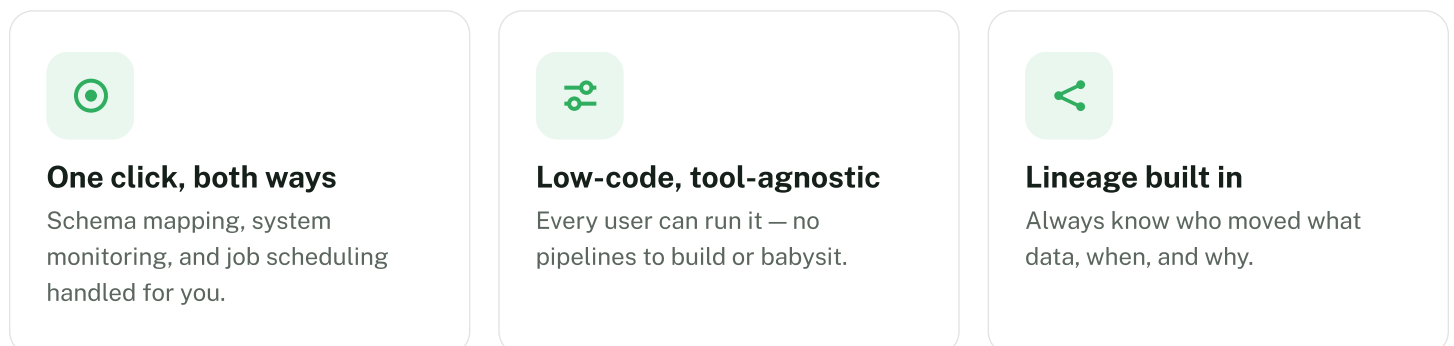

ServiceNow and Snowflake, in lockstep. One-click sync, automated operation, curated insights back — governed end to end.

HOW IT FLOWS

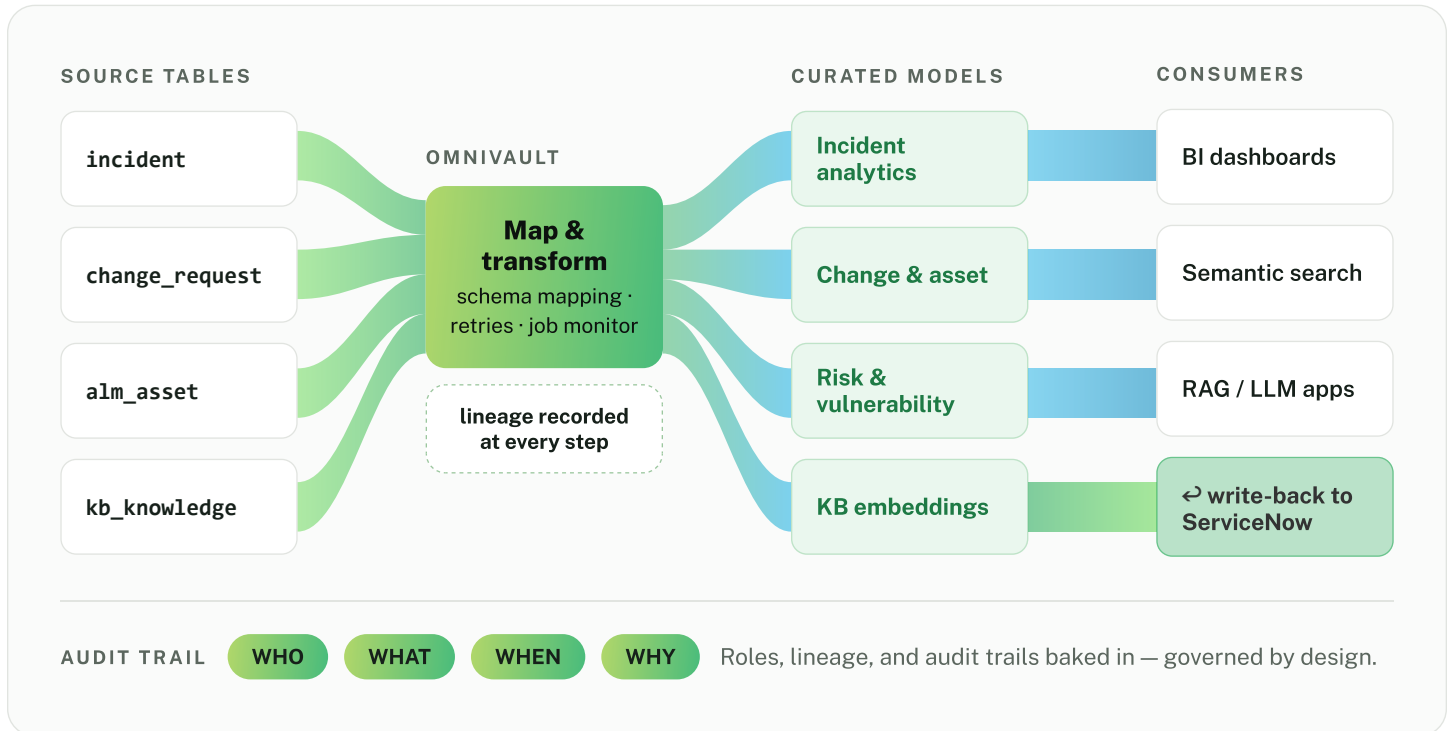

WHY TEAMS PICK IT

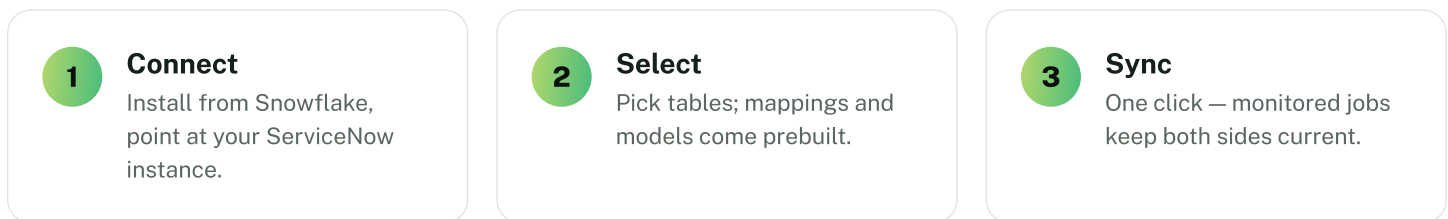

DATA LINEAGE, END TO END

Every record traceable, from source table to dashboard.

UP AND RUNNING IN THREE STEPS

WHAT YOU GET

Analytics-ready on day one — opinionated models aligned to reporting, FinOps, and security use cases.

Faster value on both platforms — cross-domain analytics in Snowflake, action in ServiceNow.

RAG / LLM-ready — incidents and KB auto-vectorized for retrieval-augmented generation.

Data as a product — governed, documented, and reusable across every team.

See your own data live in Snowflake.

Schedule a 30-minute OmniVault demo with your ServiceNow data.
